

# Washing buffer

## Contents

5X	SSPE
0.1%	SDS

## For 1 litre

250 ml	20X SSPE (pH 7.4)
745 ml	dH <sub>2</sub> O
5 ml	20% SDS

## NOTES:

Add components in the order given, i.e., with SDS added last (if SDS added to SSPE will immediately come out of solution).

Generally, the salts in the washing buffer will come out of solution when at RT. This is fine provided washing buffer is pre-heated prior to use.
